## COURSEWORK

### POST GRADUATE

Android Programming

Cloud Computing

web development

### GRADUATE

Information Retrieval

Operating Systems

Functional Programming

## SKILLS

### PROGRAMMING

Java • PHP • JavaScript

Jquery • WordPress • MySQL

• HTML • CSS

Familiar:

• Android • AWS

• Microsoft Azure • Linux

## PROFESSIONAL EXPERIENCE

### FLIPPER CODE | SOFTWARE DEVELOPER (PHP)

Jan 2023 - Present | Bikaner, India

- I have gained extensive experience working within the WordPress ecosystem.
- I have developed a deep understanding of WordPress themes, hooks, filters, and the overall architecture.
- I follow industry-standard coding best practices and guidelines to ensure the maintainability and scalability of the plugins I develop. By adhering to coding standards, I ensure that the plugins are robust, secure, and perform optimally under various scenarios.

## ACADEMIC EXPERIENCES

### PHULKARI EVA | ECOMMERCE PROJECT BASED ON PHP/MYSQL

Jan 2023 - March 2023

- Phulkari Eva is an ecommerce website focused on clothing sales. It provides users with a user-friendly interface to browse and order clothes online. The website features an "Add to Cart" functionality for easy item selection. Users can track their orders, access order history, and initiate returns. The website includes separate admin and user panels to manage buyer and product records..
- I created this in PHP and MySQL.

### EVENTOGRAM | APPLICATION CREATED USING JAVA

Sep 2022 - Oct 2023

- The management of college, event, theme, and registration details is the primary goal of the project on college event management. This general application established provisions for assisting the association's students with information on social activities, specialised activities, sports, courses, workshops, and other activities. Additionally, it enables the kids to comprehend the specifics of the next event.
- Created using java and Firebase.

### STUDENT PORTAL | WEBSITE CREATED FOR CLASS MANAGEMENT

June 2014 - Sep 2014

- The major goal is to aid in maintaining records for attendance, project submission, and assignment submission of each student, including the specifics of their academic details and lecture stream. This comprehensive system also enables professors to supply lecture details, notes, and notices, ensuring streamlined communication and efficient management of academic information.
- I created this in PHP, MySQL.

## RESEARCH PAPER

### THE IMPACT OF BIG DATA ON FRAUD INVESTIGATIONS

Jan 2023 - April 2023 | Pune, India

Co-authored and published the research paper titled "The Impact of Big Data on Fraud Investigations" with **Atul Kamble**, investigating the transformative role of big data analytics in enhancing fraud detection methods. The paper was published in the esteemed Vidhyayana e-Journal and can be accessed at article [Link](#).
